

Regulations for application

of microbiological fertilizer "Marvel Organics"

«IR-ORGANIK» LLC, 2018 r.

Type of crop	Dosage of «Marvel Organics», l/ha	Application technology	Volume of «Marvel Organics» per 1 ha, l
Grain crops	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Application of «Marvel Organics» during a presowing soil cultivation	15
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Treatment during tillering stage (during herbicide treatment)	
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Treatment during heading stage	
Leguminous crops and perennial grasses	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Application of «Marvel Organics» during a presowing soil cultivation	15
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Treatment in stage of 2-3 triple leaves (during herbicide treatment)	
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Foliar treatment in full pods stage	
Corn	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Application of «Marvel Organics» during a presowing soil cultivation	15
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Foliar treatment in stage of 2-3 full leaves	
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Foliar treatment in stage of 6-8 full leaves	
Sunflower	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Application of «Marvel Organics» during a presowing soil cultivation	15
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Foliar treatment in stage of 2-3 pairs of full leaves	
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Foliar treatment in flowering stage	
Potatoes	Treatment of potato tubers during planting "Marvel Organics" consumption: 10	Treatment of potato tubers during planting (in tank mixture with dressing agent)	25
	"Marvel Organics" consumption: 10 Consumption of working solution: 100-300	Treatment in vegetative growth stage	
	"Marvel Organics" consumption: 5 Consumption of working solution: 100-300	Foliar treatment in flowering stage	
Vegetable crops	"Marvel Organics" consumption: 2% working solution of «Marvel Organics»	Treatment of seedlings	30
	"Marvel Organics" consumption: 10 Consumption of working solution: 100-300	Foliar treatment during planting or 1-2 days after it	
	"Marvel Organics" consumption: 10 Consumption of working solution: 100-300	Foliar treatment 20-30 days after planting	

Type of crop	Dosage of «Marvel Organics», l/ha	Application technology	Volume of «Marvel Organics» per 1 ha, l
Vegetable crops (greenhouses)	"Marvel Organics" consumption: 2% working solution of «Marvel Organics»	Treatment of seedlings	30
	"Marvel Organics" consumption: 10 Consumption of working solution: depending on dosage of watering	Drip irrigation of plants during vegetation period 1-2 times with an interval of 15-20 days	
	"Marvel Organics" consumption: 10 Consumption of working solution: depending on dosage of watering	Foliar treatment of plants during vegetation period 1-2 times with an interval of 15-20 days	
Recycling of stubble residues	"Marvel Organics" consumption: 10 Consumption of working solution: 100-300	Treatment of stubble residues with subsequent cultivation	10

Microbiological fertilizer "Marvel Organics" is compatible and can be used in tank mixtures with most protectants, herbicides and fungicides, except for preparations containing chlorine and copper. This makes it possible not to change the technological cycle of plant treatment.

In case if any of the above stages of plants treatment is not part of the technological cycle of your company, our specialists will develop technology of application of "Marvel Organics" based on actual scheme of treatment of soils and plants within your enterprise.

Method of preparation of «Marvel Organics» working solution

Before preparing "Marvel Organics" working solution, the microbiological fertilizer must be shaken. When preparing the working solution, tap water or water from natural water bodies is allowed. "Marvel Organics" is not compatible with chlorine and copper-containing preparations.

When preparing the tank mixture, it is necessary to fill tank of sprayer with 3/4 and add all needed elements. "Marvel Organics" should be poured in the last turn in 5-10 minutes after filling the sprayer tank with 3/4.

Composition

Strains of rhizosphere antipathogenic bacteria *Bacillus subtilis*, nitrogen-fixing bacteria *Azotobacter chroococcum* and fungi *Trichoderma viride*, metabolites obtained during cultivation of strains, nutrient residues.

Cell concentration of strains: not less than $1,4 \times 10^7$ cfu/mL.

Biologically active elements:

Growth regulators of microbial origin, vitamins, L-amino acids, peptides, poly- and oligosaccharides.

Hazard class:

IV hazard class according to SP 2.1.7.1386-03, low-hazard substance, fire and explosion-proof.

In case of contact with eyes or skin, wash with water.

Store and transport at temperatures:

from 0 °C to +35 °C.

Shelf life: 2 years from date of manufacture.

Areas of use:

Soil treatment, root and foliar treatment of plants, treatment of trees and shrubs throughout the vegetation season.
